

Associate of Arts

Associate of Science

Associate of Applied Science

The degrees will give you the applied skills that will result in your obtaining a meaningful and gratifying job. A degree in agriculture will open the door for entry-level employment in the following areas:

Animal Agriculture
 Natural Resources
 Agricultural Mechanical Industry

Once you have landed that job, you'll have the critical thinking skills and confidence to make effective decisions regarding agricultural technology and management.

The Agriculture Department reflects the dedication Great Basin College has to the traditional values of the American West. When you graduate with an Associate of Art, Science or Applied Science in Agriculture, you become a candidate for admission into the baccalaureate programs at Great Basin College, or another four-year institution or university. The degree provides you with two years of study in agriculture employing the unique Integrative Curriculum pioneered by Great Basin College. The general education courses in which you will enroll provide a powerful foundation in oral and written communication, critical, quantitative and creative thinking, personal and cultural awareness, personal wellness, and technological understanding.

The agriculture courses in which you will enroll will prepare you for your involvement in modern agriculture as a business, a science, and a way of life. You will be able to communicate your thoughts and ideas about agriculture to others in your field, or to those who may not share your understanding of agricultural issues. More importantly, you will have the skills and knowledge to engage in the business of agriculture in a productive and responsible way.

Getting Started

- Contact Admissions and Records for admission procedures at 775.753.2102.
- Complete an official application for admission.
- Request that your official transcripts be sent to GBC.
- Contact Agriculture Faculty for advisement at 775.753.2175.
